Subject index

Adsorption
Study of the adsorption of cholate anions at the mercury–electrolyte solution interface by means of three-dimensional phase-sensitive a.c. voltammetry (Papadopoulos et al.) 223
Amperometric biosensor
Third-generation amperometric biosensor for glucose. Polypyrrole deposited within a matrix of uniform latex particles as mediator (Koopal et al.) 159

Bile pigments
Reactivity of pyrrole pigments. Part 14. The electrochemical oxidation and reduction of bile pigments (Ribo et al.) 1
Biosensors
Scanning tunnelling microscopy study of polypyrrole films and of glucose oxidase as used in a third-generation biosensor (Czajka et al.) 47
Bis(4-pyridyl)disulphide
Effect of pH on the electron transfer of cytochrome *c* on a gold electrode modified with bis(4-pyridyl)disulphide (Xie, Dong) 71
Blood serum
Differential pulse stripping voltammetry of cancerostatic 5-fluorouracil and determination in blood serum (Yan et al.) 347

Cancer
Electromagnetic fields, cancer, and the theory of neuroendocrine-related promotion (Marino) 255
Cathodic stripping voltammetry
Differential pulse stripping voltammetry of cancerostatic 5-fluorouracil and determination in blood serum (Yan et al.) 347
Cell cultures
Electrical stimulation and recording from cultured neurons using a planar electrode array (Jimbo, Kawana) 193
Chattonella antiqua
Amperometric determination of superoxide anions generated from phytoplankton *Chattonella antiqua* (Tanaka, Muto) 143
Chlorophyll *a*
The light-dependent oxygen reduction by monolayers of hydrated chlorophyll *a* oligomer (Volkov et al.) 305
Cholate aggregates
Polarographic study of the interaction of cholate aggregates with Cu^{2+}, Pb^{2+} and Cd^{2+} ions (Feroci et al.) 91
Cholate anions
Study of the adsorption of cholate anions at the mercury–electrolyte solution interface by means of three-dimensional phase-sensitive a.c. voltammetry (Papadopoulos et al.) 223
Cyclic voltammetry
An ion-gate response of the glutathione monolayer assembly formed on a gold electrode. Part 1. The effect of pH, K^+ and Ca^{2+} (Takehara et al.) 103
Electrochemical behaviour of horse heart cytochrome *c* and microperoxidase at a gold electrode chemically modified with sulphur-containing compounds (Santucci et al.) 177
Cytochrome *c*
Effect of pH on the electron transfer of cytochrome *c* on a gold electrode modified with bis(4-pyridyl)disulphide (Xie, Dong) 71
Electrochemical behaviour of horse heart cytochrome *c* and microperoxidase at a gold electrode chemically modified with sulphur-containing compounds (Santucci et al.) 177
Direct electron-transfer reaction of cytochrome *c* at a bare glassy carbon electrode (Dong, Chi) 237

Diaphorase
Catalytic capability of diaphorase bound to a

self-assembled thiol monolayer at a gold electrode (Sawaguchi et al.) 127
Determination of active diaphorase immobilized at electrode surfaces (Yamada et al.) 337
Dielectric spectroscopy
Non-linear dielectric properties of *Rhodobacter capsulatus* (McShea et al.) 205
Digital simulation
Determination of active diaphorase immobilized at electrode surfaces (Yamada et al.) 337
Direct electrochemistry
Direct electron-transfer reaction of cytochrome *c* at a bare glassy carbon electrode (Dong, Chi) 237

Electric field
Non-linear dielectric properties of *Rhodobacter capsulatus* (McShea et al.) 205
Electric fields
Exposure to electric and magnetic (EM) fields increases transcripts in HL-60 cells: does adaptation to EM fields occur? (Goodman et al.) 185
Electrochemical promoter
Electrochemical behaviour of horse heart cytochrome *c* and microperoxidase at a gold electrode chemically modified with sulphur-containing compounds (Santucci et al.) 177
Electrode layer
A photoelectrochemical study of the zeaxanthin layer deposited on a platinum electrode (Gruszecki et al.) 357
Electromagnetic fields
Ionic channel gating under electromagnetic exposure: a stochastic model (D'Inzeo et al.) 289
Electron transfer
Effect of pH on the electron transfer of cytochrome *c* on a gold electrode modified with bis(4-pyridyl)disulphide (Xie, Dong) 71
Electroporation
Electroporation in rotating electric fields (Gimsa et al.) 81
Electropulsation
Electrostimulation of plant protoplast division. Part 1. Experimental results (Montané, Teissié) 59
Electrorotation
Electrorotation of vacuoles isolated from barley mesophyll cells (Shibatani et al.) 327
Electrostatic interaction
Implications of ignoring electrostatic interaction on simulated and experimental protein titration curves (Godinho et al.) 135
Endothelial cells
Influence of culture medium characteristics on the ability to oxidize low-density lipoproteins (Pech et al.) 277
Environmental field effects
Electromagnetic fields, cancer, and the theory of neuroendocrine-related promotion (Marino) 255

Fluorescent phospholipids
Interaction of the mitochondrial membrane D-3-hydroxybutyrate dehydrogenase with fluorescent phospholipids (Latruffe et al.) 363
Fluorouracil
Differential pulse stripping voltammetry of cancerostatic 5-fluorouracil and determination in blood serum (Yan et al.) 347

Glassy carbon electrode
Direct electron-transfer reaction of cytochrome *c* at a bare glassy carbon electrode (Dong, Chi) 237
Glucose
Third-generation amperometric biosensor for glucose. Polypyrrole deposited within a matrix of uniform latex particles as mediator (Koopal et al.) 159
Glucose oxidase
Scanning tunnelling microscopy study of polypyrrole films and of glucose oxidase as used in a third-generation biosensor (Czajka et al.) 47
Glutathione
An ion-gate response of the glutathione monolayer assembly formed on a gold electrode. Part 1. The effect of pH, K^+ and Ca^{2+} (Takehara et al.) 103
Glutathione monolayer assembly
An ion-gate response of the glutathione monolayer assembly formed on a gold electrode. Part 2. The effect of alkaline earth ions (Takehara et al.) 113
Gold
An ion-gate response of the glutathione monolayer assembly formed on a gold electrode. Part 1. The effect of pH, K^+ and Ca^{2+} (Takehara et al.) 103
An ion-gate response of the glutathione monolayer assembly formed on a gold elec-

trode. Part 2. The effect of alkaline earth ions (Takehara et al.) 113
Gold electrode
Effect of pH on the electron transfer of cytochrome *c* on a gold electrode modified with bis(4-pyridyl)disulphide (Xie, Dong) 71
Catalytic capability of diaphorase bound to a self-assembled thiol monolayer at a gold electrode (Sawaguchi et al.) 127

Harmonics
Non-linear dielectric properties of *Rhodobacter capsulatus* (McShea et al.) 205
Heavy metal ions
Polarographic study of the interaction of cholate aggregates with Cu^{2+}, Pb^{2+} and Cd^{2+} ions (Feroci et al.) 91
HL-60 cells
Exposure to electric and magnetic (EM) fields increases transcripts in HL-60 cells: does adaptation to EM fields occur? (Goodman et al.) 185
Hydroxybutyrate dehydrogenase
Interaction of the mitochondrial membrane D-3-hydroxybutyrate dehydrogenase with fluorescent phospholipids (Latruffe et al.) 363

Ion-gate response
An ion-gate response of the glutathione monolayer assembly formed on a gold electrode. Part 1. The effect of pH, K^+ and Ca^{2+} (Takehara et al.) 103
An ion-gate response of the glutathione monolayer assembly formed on a gold electrode. Part 2. The effect of alkaline earth ions (Takehara et al.) 113
Ionic channel gating
Ionic channel gating under electromagnetic exposure: a stochastic model (D'Inzeo et al.) 289
Ion release
Ion release from vesicles induced by pardaxin and its analogues (Shai et al.) 315

Kinetics
Electrochemical determination of the kinetic parameters of mushroom tyrosinase (Rivas, Solis) 19

Latex particles
Third-generation amperometric biosensor for glucose. Polypyrrole deposited within a matrix of uniform latex particles as mediator (Koopal et al.) 159
Lecithin analogues
Interaction of the mitochondrial membrane D-3-hydroxybutyrate dehydrogenase with fluorescent phospholipids (Latruffe et al.) 363
Low-density lipoproteins
Influence of culture medium characteristics on the ability to oxidize low-density lipoproteins (Pech et al.) 277

Magnetic fields
Exposure to electric and magnetic (EM) fields increases transcripts in HL-60 cells: does adaptation to EM fields occur? (Goodman et al.) 185
Membranes
Electrorotation of vacuoles isolated from barley mesophyll cells (Shibatani et al.) 327
Mercury
Study of the adsorption of cholate anions at the mercury–electrolyte solution interface by means of three-dimensional phase-sensitive a.c. voltammetry (Papadopoulos et al.) 223
Metal ions
Influence of culture medium characteristics on the ability to oxidize low-density lipoproteins (Pech et al.) 277
Microperoxidase
Electrochemical behaviour of horse heart cytochrome *c* and microperoxidase at a gold electrode chemically modified with sulphur-containing compounds (Santucci et al.) 177
Monolayer assembly
An ion-gate response of the glutathione monolayer assembly formed on a gold electrode. Part 1. The effect of pH, K^+ and Ca^{2+} (Takehara et al.) 103
Mushroom tyrosinase
Electrochemical determination of the kinetic parameters of mushroom tyrosinase (Rivas, Solis) 19

Nerve regeneration
Electrical stimulation of nerves and their regeneration (Sisken) 121
Neuroendocrine model
Electromagnetic fields, cancer, and the theory of neuroendocrine-related promotion (Marino) 255
Neurons
Electrical stimulation and recording from

cultured neurons using a planar electrode array (Jimbo, Kawana) 193
Nicotinamide
Scanning tunneling microscopic probing of surface fouling during the oxidation of nicotinamide coenzymes (Wang et al.) 215
Nitrate reduction
Bioelectrocatalysed reduction of nitrate utilizing polythiophene bipyridinium enzyme electrodes (Willner et al.) 29
Non-linear behaviour
Non-linear dielectric properties of *Rhodobacter capsulatus* (McShea et al.) 205

Oxidation
Influence of culture medium characteristics on the ability to oxidize low-density lipoproteins (Pech et al.) 277
Oxygen uptake
The light-dependent oxygen reduction by monolayers of hydrated chlorophyll *a* oligomer (Volkov et al.) 305

Pardaxin
Ion release from vesicles induced by pardaxin and its analogues (Shai et al.) 315
Phospholipid membranes
Embedding of prethrombin domains of human prothrombin into phospholipid membranes (Lecompte, Dode) 149
Planar electrode array
Electrical stimulation and recording from cultured neurons using a planar electrode array (Jimbo, Kawana) 193
Plant vacuole
Electrorotation of vacuoles isolated from barley mesophyll cells (Shibatani et al.) 327
Polypyrrole
Scanning tunnelling microscopy study of polypyrrole films and of glucose oxidase as used in a third-generation biosensor (Czajka et al.) 47
Third-generation amperometric biosensor for glucose. Polypyrrole deposited within a matrix of uniform latex particles as mediator (Koopal et al.) 159
Polythiophene Bipyridinium Enzyme Electrodes
Bioelectrocatalysed reduction of nitrate utilizing polythiophene bipyridinium enzyme electrodes (Willner et al.) 29
Protein titration curves
Implications of ignoring electrostatic interaction on simulated and experimental protein titration curves (Godinho et al.) 135
Prothrombin
Embedding of prethrombin domains of human prothrombin into phospholipid membranes (Lecompte, Dode) 149
Protoplasts
Electrostimulation of plant protoplast division. Part 1. Experimental results (Montané, Teissié) 59
Pyrrole pigments
Reactivity of pyrrole pigments. Part 14. The electrochemical oxidation and reduction of bile pigments (Ribo et al.) 1

Rhodobacter capsulatus
Non-linear dielectric properties of *Rhodobacter capsulatus* (McShea et al.) 205
Rotating electric fields
Electroporation in rotating electric fields (Gimsa et al.) 81

Scanning tunneling microscopy
Scanning tunneling microscopic probing of surface fouling during the oxidation of nicotinamide coenzymes (Wang et al.) 215
Scanning tunnelling microscopy
Scanning tunnelling microscopy study of polypyrrole films and of glucose oxidase as used in a third-generation biosensor (Czajka et al.) 47
Superoxide anions
Amperometric determination of superoxide anions generated from phytoplankton *Chattonella antiqua* (Tanaka, Muto) 143
Surface oxidation
Scanning tunneling microscopic probing of surface fouling during the oxidation of nicotinamide coenzymes (Wang et al.) 215

Thiol monolayer
Catalytic capability of diaphorase bound to a self-assembled thiol monolayer at a gold electrode (Sawaguchi et al.) 127
Three-dimensional voltammetry
Study of the adsorption of cholate anions at the mercury–electrolyte solution interface by means of three-dimensional phase-sensitive a.c. voltammetry (Papadopoulos et al.) 223
Tobacco
Electrostimulation of plant protoplast division. Part 1. Experimental results (Montané, Teissié) 59

Transcription
Exposure to electric and magnetic (EM) fields increases transcripts in HL-60 cells: does adaptation to EM fields occur? (Goodman et al.) 185

Vesicles
Ion release from vesicles induced by pardaxin and its analogues (Shai et al.) 315

Zeaxanthin photoelectrochemistry
A photoelectrochemical study of the zeaxanthin layer deposited on a platinum electrode (Gruszecki et al.) 357
